

SBR Repair Advanced®

SUITABLE FOR DRY, DAMAGED, ATOPIC-PRONE SKIN

Very dry, damaged and atopic prone skin is naturally low in barrier-building lipids.

SBR Repair Advanced contains a blend of lipids, including skin-identical ceramides and squalene, along with soothing allantoin.

These lipids help to repair and restore the skin's barrier, quickly.

Introduction

The skin is the body's largest organ. The outermost layer of the skin, the epidermis, also called the skin barrier, protects the body from external stress factors such as pollution, irritants and UV-radiation, prevents loss of water, and maintains the moisture of the skin. A weakened skin barrier is less capable of controlling the skin's moisture level, which in turn leads to dry skin.

Dry skin is a very common condition characterised by a lack of water in the epidermis. The most common signs of dry skin are itching, redness, cracked or scaly skin and dry patches. The dry skin can be fragile, easily irritated, and damaged. Exposure to detergents, harsh soaps and certain medications might worsen the condition. It is also well-known that dry skin is weather sensitive and more common during cold winter months and in dry climates.

The skin barrier has a unique structure and contains a specific lipid matrix which in turn consists of fatty acids, cholesterol and ceramides, and has the function to reduce the water loss of skin. A damaged skin barrier has an altered lipid composition. It takes several days for the skin barrier to replenish its naturally occurring lipids. If the skin barrier does not have a chance to recover, the skin may become chronically dry or irritated. Some people have an innate inferior ability to replenish skin-identical lipids and therefore they have sensitive skin.

Our skin is subjected every day to wear and tear that weakens the protective and moisture maintaining function of the skin barrier. Skin hydration plays a major role in preventing the skin barrier from losing moisture and being damaged.

SBR Repair Advanced helps repair and sooth dry, damaged and atopic-prone Skin

SBR Repair Advanced is a lightweight (non-greasy), fast-absorbing formulation to repair dry, damaged & atopic-prone skin. It has been proved in clinical studies that SBR Repair Advanced is an effective skincare cream. SBR Repair Advanced is the preferred choice for people who need more than just a regular skincare cream to keep their skin soft, smooth and intact.

What is SBR Repair Advanced used for

SBR Repair Advanced is a multifaceted special cream and primarily intended for:

- very dry, damaged and atopic prone skin that is naturally low in barrier-building lipids.
- very dry and cracked skin on hands, feet, legs, arms and other parts of the body (including face)
- skin that is exposed to a lot of wear and tear, is genetically prone to have a weak skin barrier, or is generally sensitive

SBR Repair Advanced is suitable for adults and children from age 0.

How does SBR Repair Advanced work

SBR Repair Advanced Contains a unique blend of lipids, including skin-identical ceramides and squalane, along with soothing allantoin that penetrates the outer skin barrier and repairs the damaged skin. This unique blend of lipids possess important properties:

- Accelerates the skin's own barrier repair
- Instantly relieves and soothes the skin (anti-inflammatory properties)
- Intensely moisturises skin for 72 hours and prevents from dehydration
- Promotes new skin cell production (in addition to replacing skin-identical lipids)
- Forms an effective barrier against moisture loss

SBR Repair Advanced protects and enhances the barrier function of the skin. It prevents water loss, and with help of skin-identical ceramides, squalane and allantoin restores the skin barrier. SBR Repair Advanced provides instant and long-lasting hydration.

How to use SBR Repair

Apply SBR Repair Advanced on exposed skin areas (including the face) once a day, or as often as needed. For adults, children and infants.

The lightweight (non-greasy), fast-absorbing formulation is suitable for sensitive skin and long-term treatment/daily use.

Fragrance free

Ingredients:

Aqua[Water], Caprylic/Capric Triglyceride, Butyrospermum Parkii Butter, Glycerin, Cetearyl Alcohol, Ethylhexyl Stearate Helianthus Annuus Hybrid Oil, Glyceryl Stearate, Copernica Cerifera Cera, Squalane, Cetearth-20, Allantoin, Sodium Benzoate, Ceramide NP, Citric Acid, Potassium Sorbate

Total lipid content is 27%.

Storage

Store at or below 25 °C.

Keep out of reach of children.

For external use only.

Avoid contact with eyes.

Made in Sweden.
